HOW you SEE IT

Students share their point
of view on the world

Maggie Cobb (6)

"I am passionate about basketball. I'm passionate about it because I love the feeling of the basketball in my hands. I have the power to change the whole game with one pass or shot."

Ellie Warden (8)

"My coach has changed my life. Coach Leigh made me believe in myself when I didn't, and he has had my back for a very long time. Without having him as a mentor and coach, I don't think I would be where I am today, as a person or as a soccer player."

Devor Stacey (7)

"I hope to see the Earth from a different view."

Rokas Kazlauskas (6)

"The things that inspire me are the people around me. The people around me inspire me because they're always happy and that inspires me to be happy."

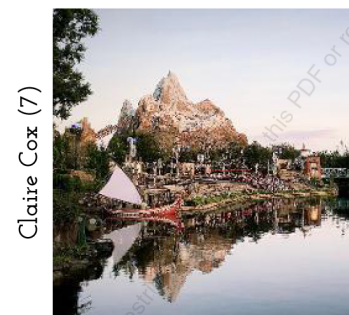

Daniel Nollar (7)

"I'm passionate about wrestling, football, basketball, weightlifting, and cars because they are all things that I am interested in and liked for a while."

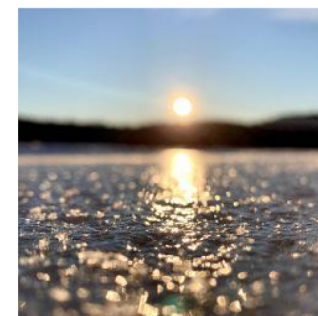

PHOTO show

Multimedia I students showcase
their photography talent

Claire Cox (7)

"I love photography because when you look at a photo it's not just a photo, it's a story that can be told and can show you the actual beauty it holds inside it."

Sienna Trier (7)

"The thing that I love about photography is that you can get up close to any object and uncover things that you might not have noticed before. You can make an object that might seem simple and plain, look magnificent and brilliant just with a photo."

Ava Mitton (7)

"I love photography because there are endless possibilities of pictures at your fingertips. You can go anywhere and do anything you want and still get cool photos. Photography put my mind to work trying to find creative ways to make something look cool, and I love creativity. Having a camera or phone in your hands sets you free to do anything!"
